

# **Workshop: Towards a better harmonization of snow observations, modeling and data assimilation in Europe, 30 - 31 October 2018**

## **Guidelines for ORAL presentations:**

- Oral presentations are 15 minutes long, followed by a 4 minute long discussion.
- Please prepare your presentation in either PDF or PPT format.
- Make sure to upload them in the break before the session to the computer in the meeting room. There will be a colleague in the meeting room to help with the uploading.

## **Guidelines for POSTER presentations:**

- Posters should have a maximum size of A0 (portrait form) and will be shown during both days of the meeting in the room just next to the meeting room, where also the coffee breaks will be served.
- Please put up your poster during the first coffeebreak after the registration.
- The poster session will be from 18:30 on Tuesday (30th of October), and will include drinks and light refreshments.
- Before the poster session, from 17:40 we will have a special session dedicated to introducing the posters, where each author will have 1:30 minutes to summarize his/her poster (so called Poster lightning talks). For this we ask you to send us 1 single slide in PDF format with a summary of your poster until the 25th of October. This slide will be shown during these 1:30 minutes.
